LIVE ON STELLAR MAINNET

ARTIFEX

Provenance, certification and funding for art on Stellar.

Team: Joel (tech lead) · Luis (art domain, gallery family)

PITCH STEP 01 / 11

PROBLEM

Provenance lives in paper and private records.

- When a work changes hands, the next buyer can’t verify it.
- Institutions need liquidity without selling or moving works.

👉 **Takeaway:** An artwork’s history should be provable, not just claimed.

PITCH STEP 02 / 11

SOLUTION

Provenance, certification and funding, on-chain.

- Certification: 1 signature for living artists; 2 for deceased (connoisseur + heir, museum or foundation).
- Public verification by QR — no wallet needed.
- Whole-work sales and participations.

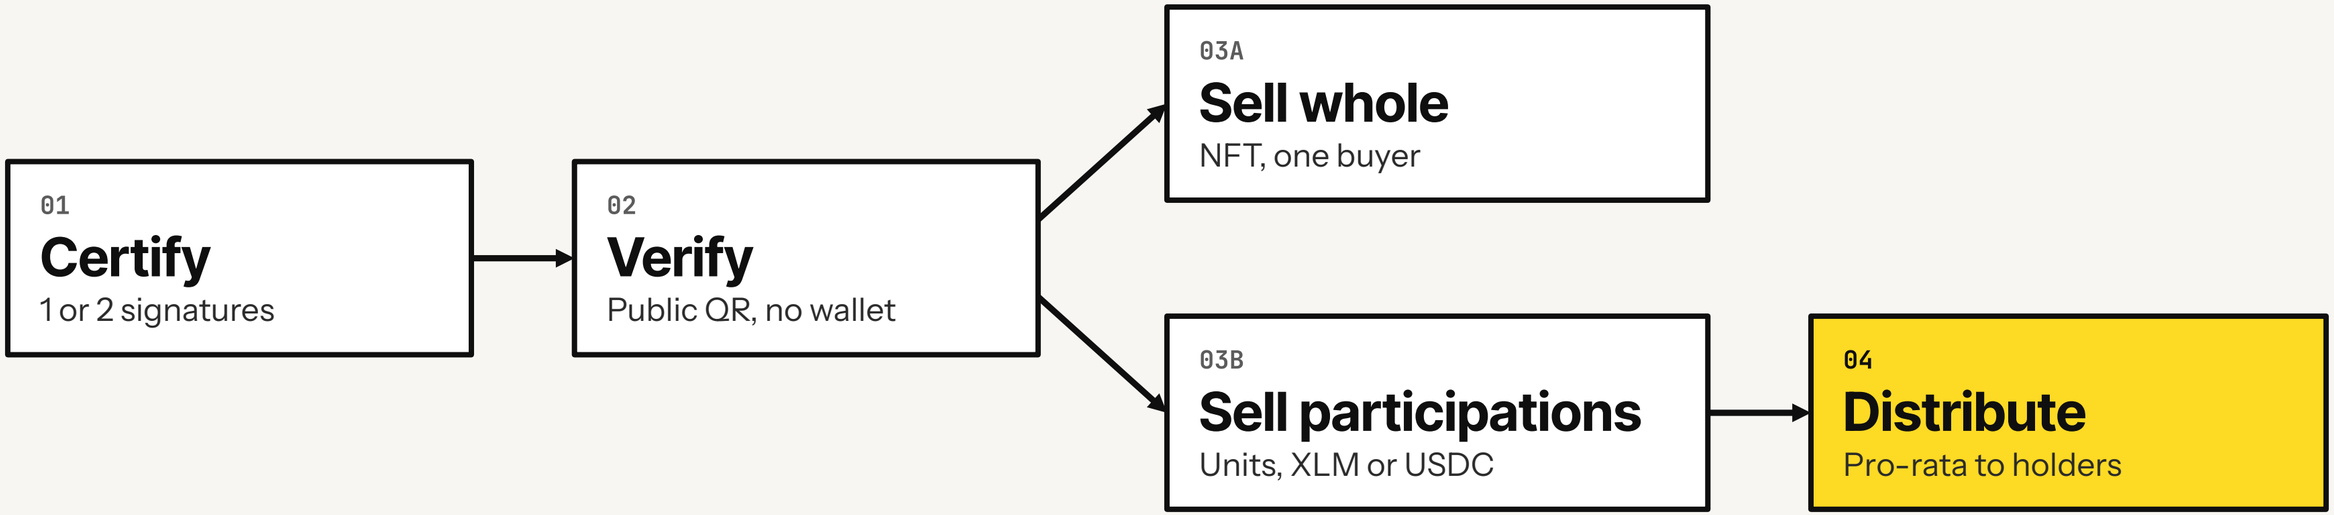

👉 **Takeaway:** One certificate that anyone can check.

PITCH STEP 03 / 11

HOW IT WORKS

From certificate to income, on Stellar.

ROADMAP

What comes next.

1. **Passkeys (no seed phrases)**
2. **iOS/Android apps with biometric signing**
3. **Legal review of participations**
4. **Contract audit**
5. **Institutional custody and multisig**
6. **Anchors**
7. **Gallery and foundation pilots**

👉 **Next on Stellar:** OpenZeppelin standards, Trustless Work escrow and path payments.

PITCH STEP 10 / 11

THE TEAM

Who builds Artifex.

Joel — Captain.

Software & systems architect, full-stack developer. Web3, blockchain and DevOps. Built the contracts, platform and infrastructure.

Luis — Art gallery founder.

Brings the art-market domain and the network of artists, galleries and foundations.

👉 **Why us:** we ship production systems and know how art is really sold.
